### General Feline Infectious Peritonitis Resources

#### Feline Infectious Peritonitis (FIP)

Feline Infectious Peritonitis (FIP) is a devastating and nearly always fatal disease of cats which arises from a mutation of the common feline coronavirus (FECV) which infects 40-80% of cats worldwide. Research over the past four decades has increased our knowledge of FIP, but we have not yet discovered a cure for this illness that affects cats, particularly young cats from catteries and animal shelters.
